Subject: Trees overgrowing Garden

Message Body:

Paulette, some time since this issue was raised with you and obviously things have only got worse.

A couple or three years your Tree Survey man told me he was recommending removal of the (ugliest tree in the world) dying tree close to our fence in Church Lane. He also asked me what I wanted done with the Field Maples which at that time were already overgrowing fence, shed and tiled Garage roof. The green house was mostly in the shade and now more so.

Well now the branches are resting on the Tiles.

What's to be done please.

Thank you
Patrick

Dear Patrick

I will ensure that the council revisits the arboreal survey on the council owned land abutting your property at it's next meeting (21st September) and then update you on their findings and decision on a schedule of work going forward.

Many thanks for bringing this back to their attention.
